**[0. Info]**

Date : 2022/08/26 - 18:48:16

Domain : <https://facebook.com>

**[1. Missing HTTP Security Headers]**

Clear-Site-Data

Clears browsing data (cookies, storage, cache) associated with the requesting website.

Ref: <https://developer.mozilla.org/en-US/docs/Web/HTTP/Headers/Clear-Site-Data>

Cross-Origin-Embedder-Policy

Prevents documents and workers from loading non-same-origin requests unless allowed.

Ref: <https://developer.mozilla.org/en-US/docs/Web/HTTP/Headers/Cross-Origin-Embedder-Policy>

Cross-Origin-Resource-Policy

Protect servers against certain cross-origin or cross-site embedding of the returned source.

Ref: [https://developer.mozilla.org/en-US/docs/Web/HTTP/Cross-Origin\\_Resource\\_Policy\\_\(CORP\)](https://developer.mozilla.org/en-US/docs/Web/HTTP/Cross-Origin_Resource_Policy_(CORP))

Expect-CT

Prevents the use of misissued certificates from going unnoticed.

Ref: <https://developer.mozilla.org/en-US/docs/Web/HTTP/Headers/Expect-CT>

NEL

Enables web applications to declare a reporting policy to report errors.

Ref: <https://scotthelme.co.uk/network-error-logging-deep-dive/>

Permissions-Policy

Previously called "Feature-Policy", allow and deny the use of browser features.

Ref: <https://scotthelme.co.uk/goodbye-feature-policy-and-hello-permissions-policy/>

Referrer-Policy

Controls how much referrer information should be included with requests.

Ref: <https://scotthelme.co.uk/a-new-security-header-referrer-policy/>

**[2. Fingerprint HTTP Response Headers]**

These headers can leak information about software, versions, hostnames or IP addresses:

Nothing to report, all seems OK!

**[3. Deprecated HTTP Response Headers/Protocols and Insecure Values]**

The following headers/protocols are deprecated or their values may be considered unsafe:

Content-Security-Policy (Unsafe Values)

'unsafe-inline' and 'unsafe-eval' negate most of the security benefits provided by this header.

**Humble HTTP headers analyzer**  
(<https://github.com/rfc-st/humble>)

Ref: <https://csper.io/blog/no-more-unsafe-inline>

Ref: [https://developer.mozilla.org/en-US/docs/Web/JavaScript/Reference/Global\\_Objects/eval](https://developer.mozilla.org/en-US/docs/Web/JavaScript/Reference/Global_Objects/eval)

Content-Security-Policy (Deprecated Directives)

Avoid using deprecated directives: block-all-mixed-content, report-uri.

Ref: <https://developer.mozilla.org/en-US/docs/Web/HTTP/Headers/Content-Security-Policy>

Strict-Transport-Security (Recommended Values)

Add 'includeSubDomains' and set 'max-age' to at least 31536000 (one year).

Ref: <https://developer.mozilla.org/en-US/docs/Web/HTTP/Headers/Strict-Transport-Security>

Ref: <https://https.cio.gov/hsts/>

#### [4. Empty HTTP Response Headers Values]

The following headers have no value (could be equivalent to as if they were not enabled):

Nothing to report, all seems OK!

#### [5. Browser Compatibility for Enabled HTTP Security Headers]

Cache-Control: <https://caniuse.com/?search=Cache-Control>

Content-Type: <https://caniuse.com/?search=Content-Type>

Content-Security-Policy: <https://caniuse.com/?search=contentsecuritypolicy2>

Cross-Origin-Opener-Policy: <https://caniuse.com/?search=Cross-Origin-Opener-Policy>

Pragma: <https://caniuse.com/?search=Pragma>

Strict-Transport-Security: <https://caniuse.com/?search=Strict-Transport-Security>

X-Content-Type-Options: <https://caniuse.com/?search=X-Content-Type-Options>

X-Frame-Options: <https://caniuse.com/?search=X-Frame-Options>
